

# FireShield Blankets

## Augment Your Safety Protocol

Constructed from durable fire-proof fabrics, our fire blankets are integral to many CellBlock FCS emergency incident kits and are a valuable tool in tackling lithium-ion battery fires.

- ✓ Use as a personal shield when approaching a battery or device in thermal runaway.
- ✓ Use to protect surrounding surfaces when dealing with a compromised personal electronic device (PED).
- ✓ Use as an additional containment layer in conjunction with CellBlock PED-Pads (fire suppression pillows) to suppress a fire.

### Testing

- ✓ 14 CFR, Part 25 D §25.853  
12 Second Vertical Burn Test  
60 Second Vertical Burn Test
- ✓ 14 CFR, Part 25 D §25.855  
5 Minute Cargo Liner Burn Test
- ✓ Experimental 30 Minute Cargo Liner Burn Test

### Specifications

- ✓ Rated for temperatures over 1000 °C
- ✓ NFPA 2112 Compliant

### Configuration

Our Standard FireShield Blanket is appropriate for consumer devices such as phones, tablets and laptops. The top layer is a fire-proof Kevlar blend that helps to contain the smoke and flames, while the bottom black felt layer actively disperses heat. Handles at each corner allow the fire fighter to safely keep hands on back side of the blanket.

- ✓ Available in 90cm x 90cm in our EHS 180 Wh kit

The High Watt Hour FireShield Blanket is recommended for batteries and devices over 100 watt hours and uses a three-layer construction to provide extended protection from thermal runaways in larger batteries.

- ✓ Available in several sizes from 90cm x 90cm and up
- ✓ Ask about custom configurations

### Recommended product pairings

- ✓ CellBlock High Heat Gloves
- ✓ CellBlock PED-Pads (Fire Suppression Pillows)

*Ask about EHS, LIBIK and EDE Kits that include the FireShield Blanket.*
